On the other hand, the combination of the Oriental and Western cultures fills this city with variety and vividness, in terms of food, literature, building, etc. Everything sparkles independently, while living in harmony.

On par with large cities around the world, Hong Kong's infrastructure achieves high standards, including the road and railway network, communications systems, banking systems, a free trading system, government regulations, etc. This helps to provide a safe and comfortable living and working environment. Above all, mainland China is booming both economically and politically, which is favorable for Hong Kong's stable development.

I would like to borrow Albert Eisenstein's famous quote: 'Life is like riding a bicycle to keep your balance, you must keep moving.' Let's keep Hong Kong moving to find her balance in establishing a brighter future. Simultaneously, gratitude turns what we have into enough! Count your blessings!

Waves of people have been leaving Hong Kong and choosing other countries as their homes. To them, Hong Kong may be overcrowded, highly-polluted, and expensive to live in ... To me, living in Hong Kong is a blessing. Why is Hong Kong a good place to live?

Firstly, Hong Kong is free from any sort of serious natural disasters. We often hear about earthquakes, tornados, tsunamis and droughts in other places. In contrast, Hong Kong only has typhoons, floods and landslides which are much weaker and much more manageable than the fatal disasters found in other places. The biggest natural disaster in Hong Kong, the 1906 typhoon, killed around 15,000 people. Given these figures, it can be argued that Hong Kong is a safe place to live.

Finally, Hong Kong has an all-rounded welfare system. In Hong Kong, children are entitled to 12 years of free primary and secondary education. It gives us an equal opportunity to learn and lays a solid foundation for us to compete for a better job. Moreover, our healthcare system is equal and efficient. We can access basic public medical services at relatively affordable prices. Ambulances provide treatment to patients within 15 minutes from the call time, saving people in need.

What's more, Hong Kong is home to many different cultures. Apart from being a Chinese society, Hong Kong was a British colony and is an international trading hub. In Hong Kong, we can enjoy food and follow traditions of foreign countries freely. We respect and embrace multiple cultures, making Hong Kong an interesting place.

To sum it all up, Hong King is an ideal place to live in. The grass is greener on the other side but gratitude turns what we have into enough. I treasure Hong Kong as my home.
